EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Arnold on 12 July 2007.

The application has been amended as follows:

40. (currently amended) A system for quantifying cardiac desynchrony of the right and left ventricles, comprising:

a medical imaging system for obtaining cardiac acquisition data;

an image generation subsystem configured to

(a) receive said acquisition data-and

(b) determine a movement profile from said cardiac acquisition data, and

(c) calculate at least one of the following from said movement profile: a time-based contraction parameter for a region of the left ventricle (LV), and a displacement-based contraction parameter for a region of the LV; and

an operator console configured to visually display said determined movement profile by generating a 3D model of the right and left ventricles therefrom;

wherein said operator console is configured for signal communication with an interventional system configured for identifying the presence of any necrosed tissue and for identifying a minimally invasive route for epicardial lead placement at said at least one suitable region on the left ventricle wall; and

Art Unit: 3737

wherein said operator console is configured for visualizing any of said necrosed tissue on said 3D model, wherein the identification of any sites of such necrosed tissue is used to eliminate said sites from the epicardial lead placement.

All other claims are maintained as filed in Applicant's response filed 22 February 2007.

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest the use of left ventricular epicardial lead placement planning using a 3D model.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
